Medical Aid Dashboard

What is it?

Family Clinic Care Plans: join a plan, choose the card it is paid from, and see your cover and documents. Same login as the clinic.

How it works

1. Choose

Pick Essential, Family Plus or Premium

2. Sign up

Create a user or sign in, same accounts as the clinic

3. Pay

Choose which saved card the plan is debited from

4. See cover

Your plan, payments and PDFs appear

Three plans

Essential R199/mo

Everyday care for one person

Family Plus R549/mo

Up to 2 adults and 4 children, unlimited discounted consultations

Premium R899/mo

Dental and optical benefits, care coordinator, chronic medication

Cards and payments

Save cards online

Brand, last four digits and expiry only

Pick the paying card

Change it or cancel any time

Demo payments

No gateway: joining records a labelled demo payment, no money moves

Progress, claims and live updates

Plan progress

A 12-month bar, next payment date, total paid and a schedule

Claims

Submit, then follow Submitted, In review, Approved or Rejected, Paid

Staff board

Staff move each claim one allowed step; the database enforces the rules

Live bell

Payments and claim changes appear without a refresh

Questions and documents

Q and A

Eight questions answered on the landing page

Sample PDFs

Benefit guides, membership certificate, terms and debit authorisation

In the portal too

The clinic portal Medical aid tab shows the plan

Safe by design

RLS

Patients read only their own plan and payments

Secure functions

Joining, changing card and cancelling go through database functions; the price comes from the database

Honest

Illustrative plans, no real payments; legal review before real members

Renewals and payment due

Daily renewal

Each day, plans whose date has arrived record the next demo payment

Payment due

If the saved card is gone or expired, the member sees a banner and staff see a badge

Honest

Still a demo: no money moves and nothing is adjudicated automatically

Design and next

Colour

Clinic blues with a teal accent and shield-and-cross logo for Medical Aid

Font

Lusitana headings, Inter text

Next

PayFast sandbox checkout (the verified webhook is built), refunds

Speaker script (about 60 seconds)

1. Medical Aid Dashboard (10s) Say it in one sentence: Join a Family Clinic Care Plan, choose the card it is paid from, and see your cover and documents.

2. How it works (12s) From the clinic portal press Enquire about a plan. It opens Care Plans with that plan selected. Sign in or create a user, then join.

3. Three plans (8s) Essential R199, Family Plus R549, Premium R899 a month. Same plan cards appear in the clinic portal.

4. Cards and payments (12s) Save a card, choose it as the paying card, join. Be clear: this is a demo payment, no gateway is connected and no card numbers or CVV are stored.

5. Progress, claims and live updates (12s) Show the progress bar and schedule, then the Claims tab. Submit a claim, move it from a staff account, and watch the bell. Say clearly: claims are tracked by hand, nothing is adjudicated automatically.

6. Questions and documents (10s) Show the Q and A on the landing page, then open a sample PDF from the Documents tab.

7. Safe by design (8s) Row-level security and security-definer functions. Price is read from the database, not the browser.

8. Renewals and payment due (10s) Explain the daily job: due plans renew, plans without a usable card are flagged. Show the Payment due badge on the Care Plan members page. Be clear that the payment is a demo.

9. Design and next (6s) Teal accent distinguishes Medical Aid. Next: connect the sandbox checkout and add refunds.
